

Free peak flow meters available to Delawareans through AstraZeneca's generous donation

Contact 800-870-3284 for a free peak flow meter

AstraZeneca, a Delaware-based pharmaceutical company, has donated digital peak flow meters made by nSpire Health to be distributed to individuals *over the age of 12* who require use of such devices for taking care of their health conditions. People with asthma, chronic bronchitis, emphysema, and pulmonary disease may use a peak flow meter to help stay healthy. A peak flow meter is a hand-held device that measures your ability to push air out of your lungs and can show signs that an asthma attack is coming. Peak flow meters are available free of charge on a first come, first served basis to Delawareans *over the age of 12*.

These devices must be distributed directly to patients and may not be distributed to or through physicians, other health care professionals, medical group practices, or to hospitals. Health care professionals can promote the availability of these devices and encourage individuals to contact the Delaware Assistive Technology Initiative. AstraZeneca and the University of Delaware make no warranty and assume no liability on the device or any of the included components.

If you or someone you know could use a peak flow meter, please contact DATI at 800-870-DATI (3284) or through the “contact us” button at www.dati.org. If you represent a group that would like to us distribute the peak flow meters to individuals in your program, please contact Tracy Mann at (302) 831-3150.

The Delaware Assistive Technology Initiative (DATI) of the Center for Disabilities Studies at the University of Delaware connects Delawareans who have disabilities with the tools they need in order to learn, work, play, and participate in community life safely and independently. If you have any assistive technology needs, please contact DATI at (800) 870-DATI (3284) or visit www.dati.org.
